

Group 33 code submission instructions

The following code uses comp0197-cw1-pt environment alongside the following packages:

- Matplotlib
- Numpy

1. Activate the environment comp0197-cw1-pt environment using the following command

```
conda activate comp0197-cw1-pt
```

- 1.1. If the environment has not been created before run the following command on terminal

```
conda create -n comp0197-cw1-pt python=3.12 pip && conda activate  
comp0197-cw1-pt && pip install torch==2.5.0 torchvision --index-url  
https://download.pytorch.org/whl/cpu
```

2. When the environment has been activated download the additional packages using the following command

```
conda install matplotlib numpy
```

3. To run the code, use the following command in terminal

```
python main_submission.py
```
